REQUEST 8 :- Create Test plan with all kinds of manual test cases in order to test this End to End functionality

Test Case ID	Test Scenario	Test Steps	Expected Result
TC-01	Validate Feed Table Creation	Run the SQL script to create Feed1, Feed2, Feed3	Tables are created with correct columns & rows
TC-02	Validate Data Generation	Execute the generate_feed procedure for each feed	Tables are populated with random data
TC-03	Validate Duplicate Identification	Run find_and_store_duplicates on Feed1	Duplicates (if any) are stored in duplicates table
TC-04	Validate Duplicate Removal	Run replace_duplicates_with_unique on Feed1	Duplicates removed; only unique rows remain
TC-05	Verify No Duplicates	Run verify_no_duplicates on Feed1	Confirms zero duplicates
TC-06	Validate Feed Comparison	Run compare_feeds for Feed2→Feed1 and Feed3→Feed1	Comparison results stored in FeedComparisonResults
TC-07	End-to-End Test	Run all scripts in sequence	Entire flow works without error; all results correct
